

# NSF's New **AUTOMATED** Laptop Screening Process

Connect to NSF's External Network in **2 easy steps**

1

**Connect your laptop** using the External Network jacks (light blue icons above network ports located on the wall). In most cases, a network cable will be provided on the conference room table.

External network access is identified by a light blue icon located on the network port. These network ports are available for visiting Panelists and Guests.

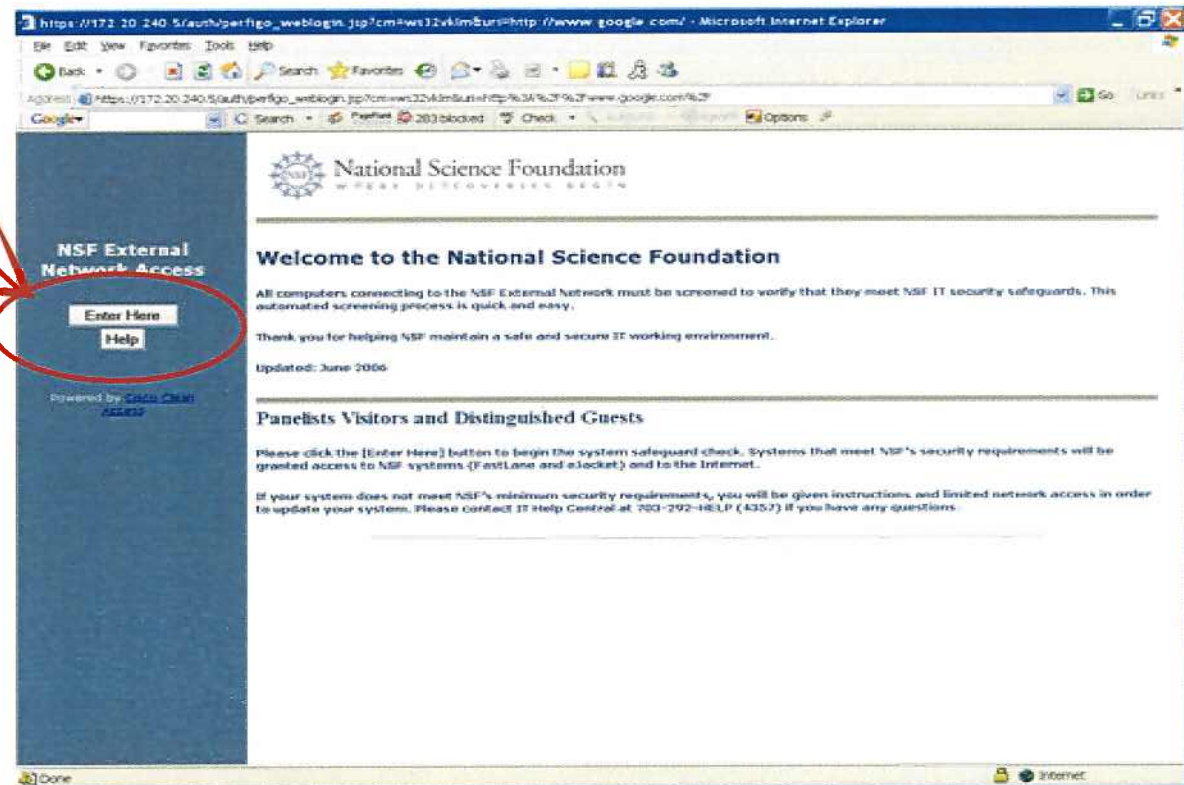

2

**Open your web browser.** You will be automatically redirected to the NSF External Network login page.

Click the "Enter Here" button (left side of login page). This launches the automated scanning process.

◆ If your computer meets NSF IT Security standards, you will have **instant access** to the Internet. (Including FastLane and Interactive Panel System)

◆ If your computer does not meet NSF IT Security standards, you will have **limited network access**. You will receive instructions to update your computer to satisfy NSF Security standards.
